ANNOUNCEMENT

EVC technology for our Evolve Instant Issuance platform

We are pleased to announce that our latest EVOLVE release in addition to supporting instant Issuance services for traditional EMV Contact and EMV Dual Interface cards is now offering Instant Issuance Services for EVC EMV Cards. This new service, brings EVOLVE to the next level, with thousands of Issuers | Financial Institutions offering at the branches, the EVC™ Card payment solution which is designed to bring EMV security to eCommerce combating fraud in Card-not-Present (CnP) transactions by replacing the static 3 or 4-digit security code printed on a payment card with a dynamic security code displayed on a small screen. The complementary combination of EMV and EVC follows the logical evolution of payment smartcards that provides a complete solution against both Card-Present (CP) and Card-not-Present (CnP) fraud.

There will be more news and exciting new features to enhance the EMV Card issuing experience, both digital and physical.

Please call us to hear more
